

Client: Walkers Crisps **Location:** Leicester **Project:** Cladding tank in pre-production area
System: Hyg K-Panel 2.5mm (4m x 1.2m sheets) **Duration of installation on site:** 2 days

A large cylindrical holding tank in the pre-production area of Walkers' manufacturing plant required over-cladding with easy-clean hygienic PVC sheets. The photos above show the first stages of installation.

Our team used flexible polymer bonding and divider bars to ensure a perfect fit to the rounded exterior of the 10m high holding tank. Over 200 square metres of cladding was needed to complete the project.

CLADDING EXPERTISE . BESPOKE INSTALLATIONS . HIGH QUALITY . HIGH VALUE
